

Diego Calderón – Senior Product Engineer (Full-Stack)

codekult@gmail.com | +54 11 33513907 | Argentina, Remote

Professional Experience

Dialpad | *Senior Software Engineer (Web Client Platform)* | Nov 2022 – Present

- Enabled enterprise onboarding (e.g. Randstad) by decoupling the monolithic development process into independent initiatives through the engineering and adoption of a Module Federation frontend architecture.
- Multiplied release velocity and reliability by automating release cycles and versions orchestration via a custom delivery infrastructure built on Node.js and GCP.

PayPal | *Senior Software Engineer (Checkout)* | May 2021 - Nov 2022

- Increased checkout conversion rates by improving perceived performance via the implementation of optimistic UI and code splitting, validated by A/B testing.
- Improved funnel conversion by optimizing data fetching efficiency through the refactoring of complex data requirements into GraphQL fragments.

Slingshot Aerospace | *Senior Software Engineer (Core Product)* | Jul 2019 - May 2021

- Unlocked critical decision-making for NASA, USAF and commercial clients by ensuring high-performance rendering of massive terrestrial and orbital datasets via the integration of modern frontend architectures with domain-specific engines (e.g. MapBox, Cesium).

Despegar.com | *Senior Software Developer (Buying Flow Platform)* | Nov 2017 - Jul 2019

- Maximized user throughput from Home to Checkout by identifying and resolving critical performance bottlenecks through a custom Real User Monitoring pipeline built from scratch using Redis, Node.js, and Grafana.
- Accelerated development cycles and ensured consistency by standardizing cross-platform UI implementation through the engineering of a custom framework that wrapped React/TypeScript components into lightweight, framework-agnostic Inferno modules.

Freelance | *Full-Stack Engineer (MVPs, Zero-To-One)* | Jan 2016 - Nov 2017

- Accelerated market entry and validation for early-stage startups by partnering on "Zero-to-One" product launches through the engineering of full-stack MVPs and advanced D3.js/WebGL data visualizations.

MercadoLibre.com | *Frontend Engineer (Checkout, MercadoEnvíos)* | Nov 2013 - Jan 2016

- Drove revenue and reach for the checkout path by optimizing for low-bandwidth and non-JS environments through the refactoring of legacy jQuery into performant Vanilla JS and progressive enhancement standards.
- Enabled the rapid growth of the Mercado Envíos logistics unit from inception by delivering the critical frontend infrastructure required for launch through the development of public landing pages and internal management dashboards.

Walt Disney World | *Web Developer* | May 2013 - Nov 2013

WOBI | *Web & UI/UX Developer* | Dec 2010 - May 2013

Nono IT | *Junior Web Developer* | Dec 2009 - Dec 2010

Technical Skills

Core Stack: TypeScript, JavaScript, React, Next.js, Node.js, SQL (PostgreSQL), GraphQL, RESTful APIs.

Platform: Micro-frontends, Distributed Systems, CI/CD, Cloud (GCP, AWS), Docker, Test Automation.

Product Engineering: A/B Testing, Design Systems, Analytics, SEO, WPO (Core Web Vitals), Accessibility.

Education: Bachelor's Degree in Computer Sciences. University of Buenos Aires, Buenos Aires, Argentina
