

Carlos Carret Miranda - Full Stack Software Engineer

krtucho98@gmail.com | +51 912 446 957 | Lima, Peru, Remote | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Experience

Fonoma | Mobile App Developer | May 2025 – Present

- Working on the complete migration of a legacy Angular mobile application to a modern React Native architecture utilizing Expo, significantly enhancing cross-platform performance and maintainability.
- Engineered and automated CI/CD pipelines leveraging Expo Application Services (EAS) and CircleCI, streamlining the build, testing, and deployment cycles for agile release delivery.
- Integrated comprehensive third-party services, including Sentry for real-time error tracking and telemetry, proactively identifying and resolving production anomalies to maximize application stability. Developed and maintained core features for top-up services and digital products.

Space Hunters | Full Stack Developer | Jun 2024 – Oct 2025

- Engineered and launched a Web3 blockchain gaming experience on the TON (The Open Network) ecosystem, seamlessly integrated as a Telegram Mini App to leverage its massive user base.
- Developed high-performance, responsive interfaces using Next.js and TypeScript, heavily optimizing the frontend specifically for mobile Web3 interactions and the Telegram Web App environment.
- Integrated wallet connectivity (e.g., TON Connect) to facilitate secure in-game transactions, smart contract interactions, and user authentication directly from the UI.
- Managed application deployment and delivery pipelines, ensuring incredibly fast load times, robust API communication, and seamless operation across diverse mobile devices.

University of Havana (Central Node) | Network Technician | Jan 2024 – Oct 2024

- Designed and engineered scalable distributed systems to enhance data consistency and reliability across the university's central communications hub.
- Managed enterprise-level network infrastructure and provided rapid technical support and troubleshooting for complex network anomalies across the campus.

Geocuba | Full Stack Developer (Internship) | Jul 2022 – Feb 2023

- Played a key role in the architectural decision-making process, actively evaluating and selecting the technology stack (Vue, Quasar, NestJS) for new company projects.
- Engineered full-stack web applications and robust backend services, overseeing the end-to-end development lifecycle from database design to the final deployment phases.
- Collaborated on database design and implementation tailored specifically for the requirements of advanced geographic information systems.

Technical Skills

Core Stack: TypeScript, JavaScript, React, Next.js, Node.js, SQL (PostgreSQL, Prisma), NestJS, C#, .NET, RESTful APIs.

Frontend: Vue.js, React, Next.js, React Native, Expo, TailwindCSS, Bootstrap, Quasar.

Backend: NestJS, Node.js, .NET Framework, .NET Core, GraphQL, MongoDB, PostgreSQL.

Tools & Platforms: Git (Graphite), Distributed Systems, Blockchain, Docker, Bash, CI/CD (CircleCI, EAS), Sentry.

Languages: Spanish (Native), English (B2), French (B2).

Soft Skills: Agile/Scrum methodologies, Teamwork & conflict resolution, Fast learner adaptable to new technologies and specialized domains.

Education

Bachelor's Degree in Computer Science – University of Havana, Havana, Cuba
(Graduated Jan 2024)
